

# AI GOVERNANCE, RISK AND COMPLIANCE

## Manage your AI GRC with Seclea

Seclea provides automatic risk and compliance tracking and reporting. Set the policies for your AI applications from development to production lifecycle stages. Seclea easily integrates an explainable and responsible AI platform to any of your AI development pipelines, whether on-premises or in the cloud. So, your data science teams have the least friction when using Seclea.

### Facilitate Data Science Teams

Seclea does not require a significant change in how your team develops AI applications. It provides explainable and responsible AI with GRC implementation and governance automatically. So your team focuses on what is essential, and we take care of AI GRC.

### Set Governance Policies

Set governance policies related to AI development and deployment. Assign responsible persons, approval structures and automatic tracking. Letting you set, monitor, report, and keep on top of your AI governance objectives.

### Automated

Seclea tracks GRC requirements automatically. So, your team spend more time focusing on the accuracy and performance of AI applications. You define when, how, and from whom (data scientist, ethics lead, risk manager, etc.) Seclea collects crucial insights to complement automatic tracking.

### Real-Time Tracking

Seclea automatically tracks, collects and reports on all AI GRC related activities carried out by relevant teams and stakeholders. Seclea reports on all activities and their potential impact on AI regulator compliance and risk management in real-time.

Seclea makes AI GRC simple and easy.
